

REMARKS

This is in response to the restriction requirement of the Office dated October 6, 2009. The Office alleges that the application contains claims that do not form a single inventive concept and requests restriction between the following groups:

Group I: Claims 1-68 drawn to a medicament carrier containing a plurality of elongate medicament carriers forming a continuous loop

Group II: Claims 70-72 drawn to a medicament dispenser comprising a movable cover coupling to a dispensing mechanism such that the movement of the cover actuates one or more components of the dispensing mechanism

Applicants elect without traverse the claims of group II. Claims 1-68 are canceled. Additionally, Applicants have added new Claims 73-88. Such claims recite a movable cover feature and support for their features can be found in reference to those embodiments set forth in Figures 14-15.

Claims 70-88 are now pending.

Respectfully submitted,

/Robert J. Smith/
